

FOR IMMEDIATE RELEASE

**DELTA[®] Machinery Responds to Customer Requests With New
Low Voltage Control UNISAW[®]**

JACKSON, Tenn. (June 16, 2010) – DELTA Machinery launches a new low voltage control UNISAW to meet the needs of industrial and institutional customers that prefer the LVC feature. The enhanced UNISAW (model 36-L552LVC) delivers the durability and power of a three-phase Baldor motor with low voltage (24V) at the switch.

Built and assembled in Jackson, Tenn., “This new UNISAW model reflects the innovation, tradition and heritage of the DELTA brand,” said Michael Boie, product manager for DELTA Machinery. “We have always provided this low voltage control as a special order option to our customers. But while doing the research for the new UNISAW, industrial and institutional users continued to ask for this as a standard offering. As a result of our research, we added a low voltage control model as a standard listing to our product line to support the varying needs or preferences of our users.”

All other aspects of the LVC UNISAW are identical to the original UNISAW relaunched in 2009, including a unique one-piece cast-iron trunnion design, a bevel gauge centered between dual front cranks, a rise-and-fall two-position riving knife, a modular tool-free guarding system and a fully integrated dust collection system. This table saw is ideal for general ripping, cross cutting, tenoning and dado cutting, re-sawing and specialized jig and fixture applications.

--MORE--

The new 36-L552LVC DELTA UNISAW is backed by a five-year warranty and is available now at specialty woodworking dealers for a suggested retail price of \$3,799.

About DELTA | PORTER-CABLE

With a combined 195 years of woodworking expertise, [DELTA | PORTER-CABLE](#) designs and manufactures a robust line-up of portable, stationary and benchtop woodworking power tools, equipment and related accessories for professional woodworkers. The brand has a history of industry-changing innovation, introducing many of the world's first power tools, including the helical drive circular saw, hand-held belt sander, motorized miter saw, portable belt sander, and 10-inch tilting arbor saw.
